Welcome to the fall issue of The Shoekd!

ON THE COASTLINE

Thursday, October 21st
10/21. If you'll be on campus at that time, be prepared to
Coastline College, to obtain membership and conference
industries that are part of Supply Chain Management.

Supply Chain Management is an emerging field that is key to the future of business and industry. By integrating the functions of purchasing, transportation, storage, and distribution, supply chain management helps companies reduce costs, improve quality, and increase customer satisfaction. With the increasing importance of sustainability and ethical business practices, supply chain management also plays a crucial role in shaping the future of the global economy.

Dolphins embody many of the characteristics of Coastline
students, including intelligence, resilience, drive, focus, and
also a reminder that Coastline cares about the educational
students, including intelligence, resilience, drive, focus, and
among our entire campus community.
5 FASCINATING FACTS ABOUT DOLPHINS 4. Dolphins have few natural enemies.

Dolphins are known for their intelligence and social behavior, but what about their natural enemies? While they may be able to fend off predators like sharks, their main threats come from human activities such as commercial fishing and pollution. However, they do have a natural predator: the orca. Orcas are known to hunt dolphins for food, and their attacks can be quite aggressive. This interaction is a stark reminder of the delicate balance of nature and the importance of protecting marine life.
